MISCELLANEOUS.

***A nonhuman primate, identification Z14057, was found to have a fractured left arm on 1/20/2016. On 1/20/16 the primate presented with mild lameness and moderate swelling of its left lower arm. A veterinarian was contacted, the fracture diagnosed by radiography and the animal was provided adequate veterinary care to include casting of the arm. The facility was unable to determine what caused the fracture.

Handling of all animals shall be done as expeditiously and carefully as possible in a manner that does not cause trauma, behavioral stress, physical harm, or unnecessary discomfort.

Inspection and exit briefing were conducted on 2/9/16 with facility veterinarian.

An additional exit briefing was conducted on 2/12/16 with facility representatives upon inspection report delivery.
